## EXPERIENCE

### **Independent, Various Locations — Dev / Consulting**

I have created quite literally hundreds of websites for clients as varied as a Governor of the United States to a down home mom and pop store.

I have functioned as a consultant, designer, and developer for well over a decade as an independent professional.

Then I discovered Python. Now all I want to do is write better and better Python code solving complex problems.

### **D2 Interactive, Oxford MS — COO**

Provided project leadership managing development team including budget control, production timetables, client/project team co-ordination, work flow, and quality assurance.

### **Habooble, Telecommunte — Lead developer**

Contract work leading to full time employment. Imagineered, developed, and deployed innovative WordPress based websites using custom PHP / MySQL.

### **e-WebCorp, Tifton, Ga. — Principal / Founder**

Computer networking, web development, Perl programming, server administration. RedHat certified.

## TESTIMONIALS

"I've worked with James Kendall on more projects than I care to count. On point, on schedule, on budget, every time. I can't recommend James more highly."

**Christopher Conlan - Habooble Communications**

"James is always helpful. It doesn't matter if I have what he had asked for, he was patient and worked through it with me. He's a solid resource, willing to do whatever it takes to do what's right."

**Brent Rangen - Co-Founder at Poor Logistics**

## SKILLS

Python . Pandas . scikit-learn . Flask
